DETAILED ACTION

1. Claims 1-33 were presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. ***Claims 1-15*** are drawn to system of network intrusion detection, classified in class 726, subclass 23.

- II. ***Claims 16-33*** are drawn to vulnerability assessment of network data processing, classified in class 726, subclass 25.

3. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility as system of network intrusion detection different from invention II. Invention II discloses vulnerability assessment of network data processing through the use of attribute components such as geographical location data, and use of a security defense appliance which can be used to implement other protocols different than the one set forth by invention I.

In the instant case, invention II has separate utility as vulnerability assessment of network data processing different from invention 1. Invention 1 discloses system of network intrusion detection which can be used to implement other protocols different than the one set forth by invention II.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. A shortened statutory period for reply is set to expire THIRTY DAYS from the mailing date of this communication. Failure to respond within the period of response will cause the application to become abandoned (35 U.S.C. Sect 133). Extensions of time may be obtained under the provision of 37 CFR 1.136(A).
